Self-leveling clips are used to ensure that ceramic tiles are leveled before being installed. These clips are placed between the tiles and automatically adjusted to level the tile and ensure it is flat and free of irregularities.

They are especially useful in areas with irregular soils or with changes in level. They help ensure the tiles are level and there are no irregularities in the floor, which can prevent aesthetic and functional problems in the future.

- They are millimetric (as the previous ones), helping to a perfect levelling of the tile.
- The rear area is wider and higher, allowing it to be placed with the fingers/palm of the hand.
- Design of the wedge tip with joint size indications, which can help to realise the joint width especially in large formats (placing the wedge vertically).

CLIP COMPATIBLE WITH A THREAD REGISTERED MODEL

It can be used with  DGCUNA01

It can be used with  DGROSCAV

In DOGA we like to adapt to our customers, that's why we launched the new clip compatible with thread. This can be used with both the wedge and the thread.

PRINCIPAL ADVANTAGES:

- Clip compatible with fabricado thread with **recycled material**
- Clip compatible with **thread and wedge**
- Easy to use
- Saving costs and time
- **Reusable** thread
- Perfect and clean break
- Fine-tuning

1. After spreading the adhesive, insert a doga roll clip under the tile at each intersection. Depending on the dimensions of the tile, place one or several clips per side.

2. Place the doga roll into the edge of the doga roll clip and screw in until the tiles are correctly aligned.

3. As soon as the adhesive has dried, snap off the upper part of the clip with a rubber mallet or simply kick off the side of it.

Flooring and tiling the professional way

An ingenious and revolutionary system. DOGA LEVELLING KIT is a useful system for all kinds of flooring and tiling.

PERFECT FOR ANY KIND OF SURFACE

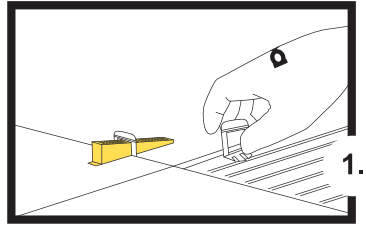

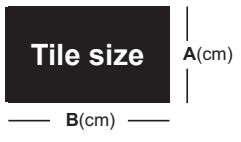

- Floors
- Walls
- Ceramic tiles

ADVANTAGES

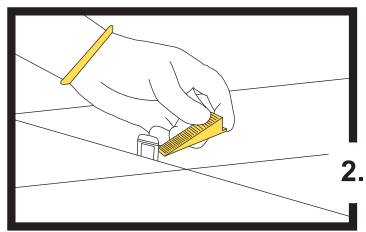

- Quick and easy to use.
- Time-saving
- Guaranteed even tile surface whatever size the tiles are.
- Neat and tidy finish
- Reusable

After spreading the adhesive, insert a clip under the tile at each intersection, depending on the dimensions of the tile, place one or several clips per side.

Place the wedge in the gap of the clip.

Use the adjustable pliers for perfect levelling, being careful not to move the breaking point.

As soon as the adhesive has dried, snap off the upper part of the clip with a rubber mallet or simply kick off the side of it.

OPTIONAL:
Stackable fixed pedestals

The fixed pedestals consists of a high resistance base which is placed directly onto the waterproofing layer. The paving slabs are then placed directly onto the supports without the use of concrete or adhesives of any kind. The base of the support is made of HDPE material and its shape allows rainwater to drain and flow easily on the underlying waterproof layer, avoiding water stagnation.

ADVANTAGES:

- Low installation cost
- Fast accessibility by moving any paving slab of the practicable surface in need of inspection of the inner layer, which can even be done without breaking any paving slab
- Roof insulation thanks to the cavity formed between the inner layer and the practicable surface

ADJUSTABLE PEDESTALS NEW

REFERENCE	SIZES	UNITS BOX	PACK PALLET

DGE204588	83-134 mm	24	25
DGE204595	133-225 mm	24	25

The adjustable pedestals are made of the highest quality polypropylene and with suitable additives to guarantee long life and increased load capacity.

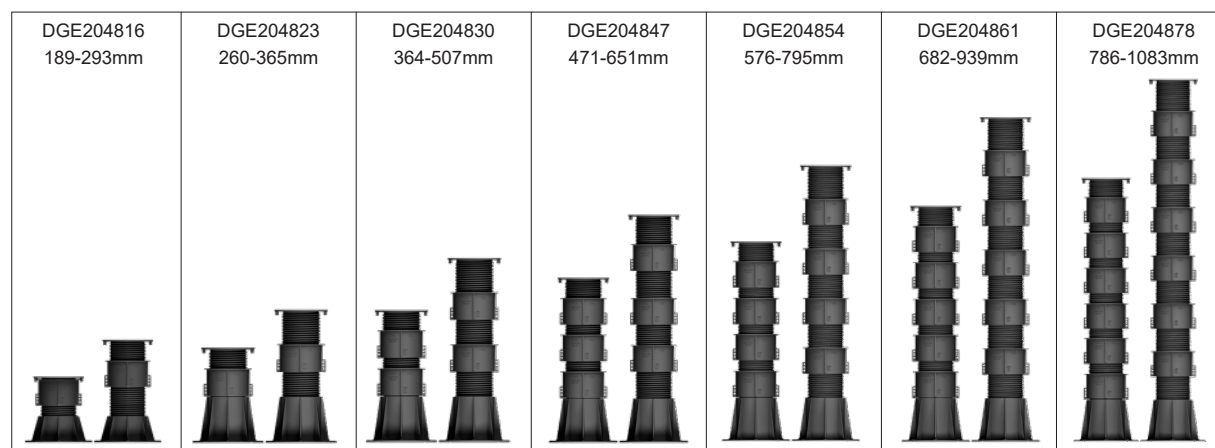

They can be used with a wide range of different types of paving, such as tiles, marble, stone, wood, etc. It is the perfect solution for turning non-practicable areas into practicable ones, whether they are waterproofed or not, also allowing the laying of cables and pipes that are normally present in offices, shops, and work environments.

For this reason, raised floors are mainly used in new buildings but also in refurbishing projects where maximum design and flexibility are required; or simply to ease inspection of the waterproofing layer, pipes, cables, etc.

To all these **adjustable pedestals can be added a self-leveling head of 7%**, thus becoming an adjustable self-leveling plot.

In addition, there are infinite combinations with all the accessories, thus being optimal for all types of facilities.

Stainless steel AISI-304

Every boxes contain: 200 block 5x25mm + 200 screw 3.5x40mm

The flattened ones placed with glue must also be fixed mechanically to avoid the eventual detachment of tiles. Our staples are pieces of protection and security for tiles in flattened facades. The central safety ones support one tile up and one tile down; the final safety boot tiles are designed for a single tile. If the staple is visible, the maximum thickness of the tile can be 10mm or 16mm; if the tile is grooved its thickness can reach up to 20mm or 32mm.

SAFETY CAP NEW

REFERENCE	PRODUCT	UNITS / BAG	MINIMUM ORDER QUANTITY
DG203826	Safety cap (rod from 8 to 20mm)	250	1 bag
DG203833	Safety cap (rod from 24 to 40mm)	150	1 bag

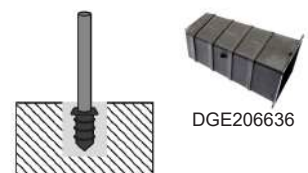

Safety cap in the form of a mushroom. Placement in protruding corrugated steel rod. With its placement protects the worker from sharp rods, in case of fall or friction. The inside of the piece is formed by 4 flexible fins, for the perfect anchoring of the rod.

BASE LIFE LINE NEW

REFERENCE	PRODUCT	SIZES	UNITS / BOX	MINIMUM ORDER QUANTITY
DGE206636	Base life line	60 x 40 mm	50	1 bag

It is used for positioning, fixing and positioning of lifeline poles and network arm poles.

BASE HORCA NEW

REFERENCE	PRODUCT	SIZES	UNITS BAG	MINIMUM ORDER QUANTITY
DG206339	Base horca (safety fence)	80 x 85 mm	64	1 bag

For positioning, fixing and positioning of Horca davits for security fences and their nets in buildings.

DG206339

CONIX BASE NEW

REFERENCE	PRODUCT	SIZES	UNITS BAG	MINIMUM ORDER QUANTITY
DG206346	Conix base	40 mm	150	1 bag

For the placement of body guards in buildings. Avoids work accidents, possible falls of personnel.

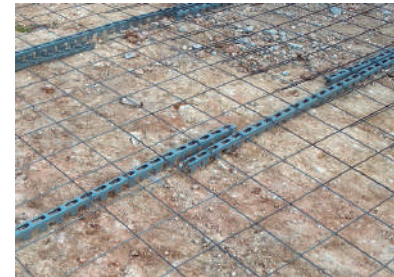

DG206346

SAW PLASTIC SPACER NEW

DGE203871	Spacer 50 mm	50mm x 2mts	30 strips (60 mts)	28 tied	1 box

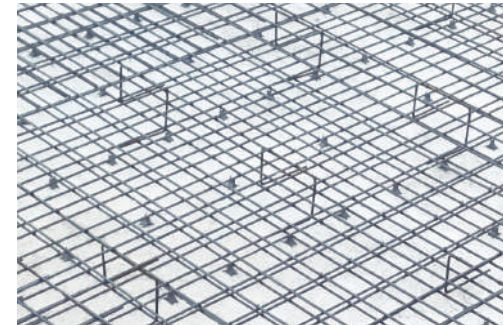

Designed to place corrugated rods at the required distance in the formwork, depending on the concrete load of the structure. They are used for horizontal and vertical surfaces.

CONDOR SPACER NEW

REFERENCE	PRODUCT	SIZES	UNITS BAG	MINIMUM ORDER QUANTITY
DG203949	Spacer 20 mm	20 mm	1.000	1 bag
DG203956	Spacer 30 mm	30 mm	500	1 bag
DG203963	Spacer 40 mm	40 mm	500	1 bag
DG203970	Spacer 50 mm	50 mm	500	1 bag

Plastic separator for reinforcement in formwork, slabs, prefabricated and building. It is used to maintain the required distance between the steel in the concrete slab, retaining the coatings specified for each structural element. They do not allow corrosion of the armor. Mainly designed for horizontal reinforcements, high strength, for electrowelded mesh or corrugated rod. For all corrugated stockings up to 25 Ø

DGE206643

Sponge floats are tools used to remove finishing products on surfaces that have just been re-laid. The sponge has porosity and softness, which allows the sponge pads to absorb and dispense the right amount of product, allowing uniform application.

There are different types of float, sponge of different densities and degrees of hardness to suit different types of finishing products. It is important to clean the float after use to keep it in good condition.

RUBBER FLOAT KIT

HARD - HALF - SOFT

REFERENCE	SR003898
SIZE	250x95
UNITS BOX	12
MINIMUM ORDER QUANTITY	1 unit

RUBBER FLOAT KIT
SR003898

The rubber to choose depends on the size of the tile:

For large format tiles, a hard rubber (red) is recommended and for smaller formats like cladding or mosaic, a soft rubber (white) is recommended.

Grey rubber is an intermediate.

Superfine.
Porcelain and ceramic.

Ceramic cutting discs are specialized cutting discs used to cut ceramics, porcelain and tiles. These discs are made of abrasive materials and have a specific design that allows them to cut these materials efficiently and accurately.

They are used with rotary tools, such as power saws or grinders. They can be used to cut ceramics into straight or curved shapes, according to the disc design.

Some ceramic discs are designed to cut ceramics quickly, while others are designed to cut ceramics accurately and without leaving marks on the surface. There are also ceramic discs with different degrees of abrasion, allowing professionals to choose the right disc for the specific job.

PRODUCT DETAILS:

- Straight cut from 68cm to 160cm, depending on the model
- Diagonal cut from 40x40cm to 90x90 cm
- Cutting thickness 2cm - Wheel ø 12mm with pin art. 148BLI
- Aluminum frame that guarantees its robustness and lightness
- Plans with springs
- Aluminum handle with special offset and anti-scratch protection
- Adjustable angles form -45° to 45 with measuring bar and centimeter scale on the diagonal
- Square with pivot on the cutting line that ensures the real measurement for the straight and diagonal cutting. Equipped with non-slip rubber feet and side supports for large format tiles
- Transport case available upon request

MAXIBELLA TOP 120

Wet saw with 250 mm (10") continuous rim diamond blade

Cortadora refrigerada por agua con disco diamantado ø250 mm

For cutting up to 120 cm (47") porcelain tiles, high thickness as well, marble and granite, with a maximum thickness of 5,5 (2"). The machine is equipped with direct drive; cut switch with thermal cutout; cooling by water pump and flow governor tap; sliding motor unit on four adjustable iron pulleys; tiltable motor unit at 45°; height block; measuring guide for linear and diagonal cuts; 115 x 45 cm (45x18") wide cutting tables.

SR6350XL	DOGA FLEX 3 CG	-	121-371	60x41x26	125

It includes: cutting unit with Bosch 1300W M14 grinder, disc Ø mm 125 and case.

SR6350

DOGA FLEX 3 is a cutting system for large ceramic gres porcelain and marble slabs. It allows linear and 45° cuts and angular profiling. It consists of a sliding carriage for housing an angle grinder with diamond blade to be used on one of guides available. Thanks to four ball bearing pulleys, DOGA FLEX 3 smoothly slides along the guides and it also has a swinging motion for adjusting the depth of the cut. Our system, is the only one with a millimetric adjustment device and two clamps allowing to reach the 45° position of the blade. DOGA FLEX 3 can house most of the angle grinders on the market and is also designed to connect a vacuum cleaner.

DOGA GUIDE 3

REFERENCE	PRODUCT	W	←→ cm	↘ cm	⊙ ø mm
SR17270GC	DOGA GUIDE 270	-	270	202x30x20	-
SR17330GC	DOGA GUIDE 330	-	330	202x30x20	-

The modular aluminium sliding guides, available in two lengths, are equipped with a system to connect the modules (120 cm e 180 cm), with male or female end. The suction cups can be moved to any position on the guide. Thanks to a special rubber profile, the suction cups work on smooth and rough surfaces.

SR17330GC

WORKBENCH

REFERENCE	PRODUCT	W	←→ cm	↘ cm	⊙ ø mm
SR6345	WORKBENCH	-	175x100x85	206x40x22	-
SR6345-1	EXTENSION FOR WORKBENCH	-	175X25X85	-	-

The workbenches have planking and cross pieces in drawn aluminium to guarantee lightness and stability. They come with plastic guards for the drawn parts (top of the workbench) and with a system of adaptation to the ground and height adjustment. Thanks to the available junctions, the workbenches can be easily connected together, to be adapted to the dimensions of the tile sizes to be cut. The workbenches are delivered with foldable legs to facilitate transport.

SR6340

DOGA TROLLEY

REFERENCE	PRODUCT	W	←→ cm	↘ cm	⊙ ø mm
SR6330	DOGA TROLLEY	-	130x50x150	170x38x26	-

Doga Trolley is a lightweight and stable trolley in aluminium for handling large slabs. It has 4 rubber wheels and two slab loading positions; its base is in non-slip wood; equipped with fall protection devices. DogaTrolley is delivered unassembled to facilitate the transport.

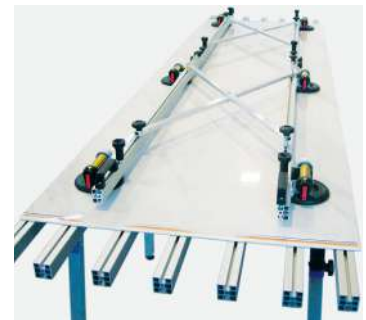

SR6330

DOGA MACHO

REFERENCE	PRODUCT	W	←→ cm	↘ cm	⊙ ø mm
SR64000-300	DOGA MACHO 300	-	310x100	170x38x26	-
SR64000-240	DOGA MACHO 240	-	240x100	170x38x26	-
SR64000-150	DOGA MACHO 150	-	150x100	170x38x26	-

This is a system for lifting large slabs up to 300 x 100 cm. Adjustable frame in width, with a pump suction system and cup fault indicator, for lifting slabs with rough and smooth surfaces. To facilitate transport, SiriMacho is delivered unassembled; it consists of two parts measuring 150 cm each which can also be used separately. The maximum vertical load that can be lifted is 40 kg for each suction cup.

SR6420KIT

DOGA HULK KIT

REFERENCE	PRODUCT	W	←→ cm	↘ cm	⊙ ø mm
SR6420KIT	DOGA HULK KIT	-	200x320	215x40x30	-

Lifting system for slabs up to 320 x 180 cm. Adjustable frame in length from 200 to 320 cm (78"x 126") and in width from 100 to 160 cm (39"x 63"). Equipped with a pump suction system for handling slabs with rough and smooth surfaces and system fall protection.

REFERENCE	PRODUCT	W	←→ cm	↘ cm	⊙ ø mm
SR6420VTKIT	DOGA HULK MAX KIT	-	200x320	215x40x30	-

Lifting system for slabs up to 320 x 180 cm. Adjustable frame in length from 200 to 320 cm (78"x 126") and in width from 100 to 160 cm (39"x 63"). Equipped with a pump suction system with gauge for handling slabs with rough and smooth surfaces and system fall protection.

SR6420KIT

DOGA CLOSE

REFERENCE	PRODUCT	W	cm	cm	ø mm
SR30-3	DOGA CLOSE	-	-	58x20x25	-

Suction cups system to move near large tiles.

SR30-3

DOGA VIBRO

REFERENCE	PRODUCT	W	cm	cm	ø mm
SR30001	DOGA VIBRO	12V	-	42x18x14	-

DOGA VIBRO is a vibrating system for large format tiles and slabs. The vibrating suction cup is Ø 135 mm with 6 power adjustments, locking system with lever, release button and two handles. Supplied with two 12 V batteries, a charger and a suitcase.

SR30001

DOGATABLE

REFERENCE	PRODUCT	W	cm	cm	ø mm
SR6338	DOGATABLE	-	-	115x60x70	-

Professional work-bench for tilers, in marine wood, with sturdy metal frame, foldable and easy to transport.

SR6338

DOGA PUMP

REFERENCE	PRODUCT	W	cm	cm	ø mm
SR30OCTO	DOGA PUMP S	-	-	39x39x15	-

Ø 150 mm (6") vacuum suction cup without case.

REFERENCE	PRODUCT	W	cm	cm	ø mm
SR30OCTOV	DOGA PUMP C	-	-	39x39x15	-

Ø 150 mm (6") vacuum suction cup with case.

REFERENCE	PRODUCT	W	cm	cm	ø mm
SR30OCTO-VT	DOGA PUMP CP	-	-	39x39x15	-

Ø 150 mm (6") vacuum suction cup with gauge - no case.

REFERENCE	PRODUCT	W	cm	cm	ø mm
SR30OCTO-VTV	DOGA PUMP SP	-	-	39x39x15	-

Ø 150 mm (6") vacuum suction cup with gauge and case.

Ø 150 mm (6") vacuum suction cup with red line for vacuum loss. Suitable for smooth and textured surfaces. Maximum vertical load 40 Kg. Maximum horizontal load Kg 70.

SR30OCTOV

SR30OCTO-VT

DOGA HOLDER

REFERENCE	PRODUCT	W	cm	cm	ø mm
SR10035DOP	DOGA HOLDER	-	-	24x17x15	-

Panel holder with jaws to lift ceramic, glass, wood panels, etc. The transparent rubber coating prevents the color of the jaws from staining the workpiece. Possibility of vertical and horizontal lifting.

SR10035DOP

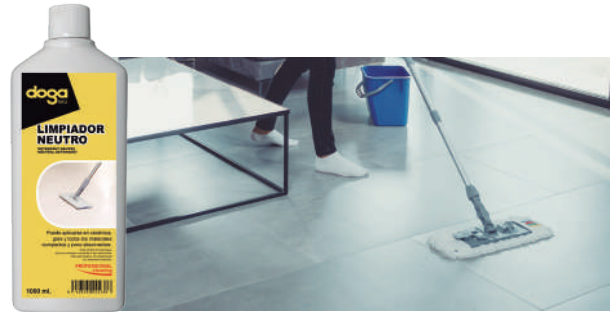

maintenance of porcelain tiles

NEUTRAL CLEANER

REFERENCE **DGNEU-01**
SIZE 1L

Power cleaning. No rinsing needed.
No residues.

ANTI-SLIP TREATMENT matt

REFERENCE **DGTRA-01**
SIZE 1 L

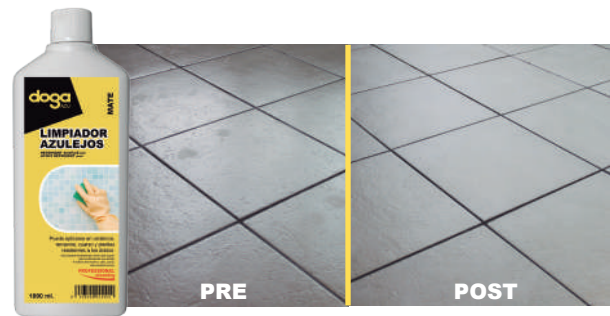

Anti-slip for wet surfaces.

TILE CLEANER matt

REFERENCE **DGAZU-01**
SIZE 1L

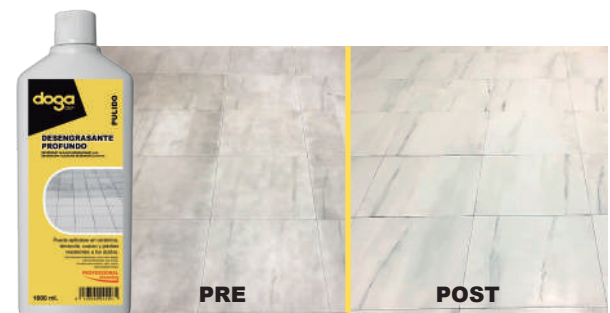

Deep cleaning. Suitable for rough surfaces. Gets rid of surface patina.

STRONG DEGREASER for polished surfaces

REFERENCE **DGDEP-01**
SIZE 1L

It removes greasy dirt also generated by pedestrian flow.

CEMENT CLEANER matt

REFERENCE **DGCEM-01**
SIZE 1L

REFERENCE **DGCEM-05**
SIZE 5L

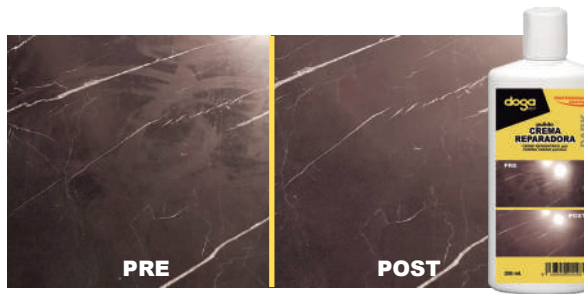

Residue cleanser from cementitious joints after installation.

REPAIRING CREAM light polish

REFERENCE **DGREPC-25**
SIZE 0.25L

Re-polishing. It reduces the accumulation of dirt, scratches, and defects.

REPAIRING CREAM dark polish

REFERENCIA **DGREPO-25**
TAMAÑO 0.25L

Re-polishing. It reduces the accumulation of dirt, scratches, and defects.

REPAIRING CREAM matt

REFERENCE **DGREP-25**
SIZE 0.25L

It removes back-marks, scratches and defects on natural or textured.

DOGA stone

MAGICAL STONE

REFERENCE **DGMAGIC-50**
SIZE 0.50L

Stain-remover specific for greasy and oil stains

STOP WATER

REFERENCE **DGSTOP-05**
SIZE 5L

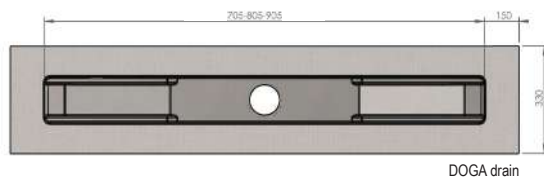

Invisible solvent based water-repellent deep penetrating treatment

DOGA drain

DOGA drain plus is ideal for contouring obstacles such as beams, pipes, cables...

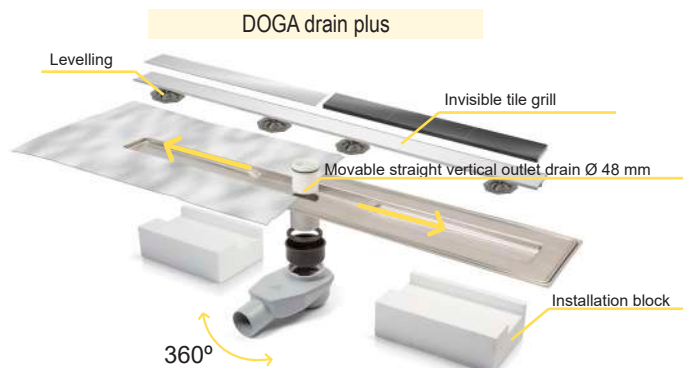

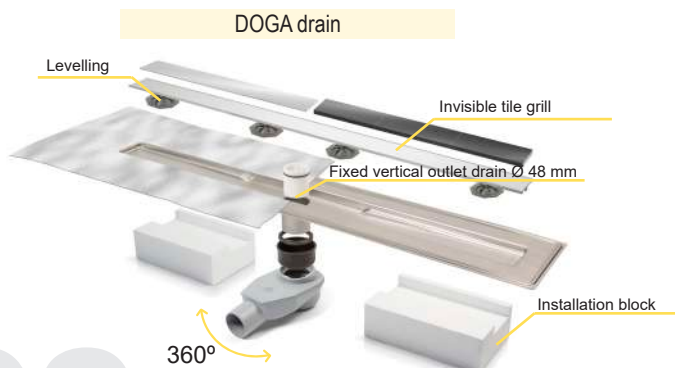

DOGA drain

DOGA drain plus

- The outlet of the siphon can be twisted 360° which results in a straight line of the drain pipe towards the stack. This situation gives you a 100% flow rate (34l/m).
- The siphon outlet is 50mm
- The inside siphon "cup" can be removed for access to the waste line (camera inspection or deblocking). The strainer empaches long hair to enter the waste line.
- The drain body has an **integrated 8% slope** (30cm left and right of the siphon) for accelerating and guiding the water towards the siphon. Even when the drain is not installed levelled, the water will run towards the siphon.
- The drain body is deep drawn out of 1 piece which results in seamless corners (round and smooth for better maintenance) and avoids split corrosion in the corners (in case of a welded drain).
- The "grating base" is an important innovation which allows you to create all desired finishing you wished for : glass, stainless steel, wood,... Only 1 rule : the thickness glued on the grating base must be equal or thinner then the surrounding tiles. The ingenious levelling system of the grating base will adjust the levelling up with the surrounding tiles. (The "grating base" is included in the kit and it is recommended to stick it with MS POLYMER)
- Everybody wants "frame less" : no visible silicone and only a slot where the water runs through. This slot can almost eaquel to the tile joints (width of the tile can be different then the width of the grating base). This finish gives a minimalistic look to the shower area.
- Hoover frame : multiple advantages
 1. When the tile installation failed (tiles not straight cut, chips on tile edges,...) you can use the Hoover frame to disguise the imperfections.
 2. You really want a frame finish on the tiles floor
 3. The hoover frame is so discrete and almost invisible
- The **water proofing membrane** is factory bonded on the drain flanges. From here you can continue to water proof your complete shower area.
